

Item Card — Cross-Platform Contract

Single canonical spec at `test-fixtures/item-card-scenarios.json`. Mobile renders via `FetchCard` (Flutter). Web renders via `ItemRowCard` (React). Both must produce visually-equivalent output for the same props.

PROP CONTRACT

PROP	TYPE	DEFAULT	DESCRIPTION
<code>title</code>	string	—	Item name. Truncates to 2 lines.
<code>subtitle</code>	string?	—	One-sentence metadata line (≤ 2 lines).
<code>imageEmoji</code>	string?	—	Emoji rendered in the tinted image tile when no URL.
<code>imageUrl</code>	string?	—	Product image URL. Falls back to <code>imageEmoji</code> on error.
<code>tint</code>	color hex	—	Tile-bg color. Card body is always white.
<code>urgency</code>	string?	—	Top-of-content pill. Lightning bolt added when text contains 'left'.
<code>urgencyBg</code>	color hex?	—	Urgency pill background. Defaults to rose-200.
<code>urgencyFg</code>	color hex?	—	Urgency pill text/icon. Defaults to rose-900.
<code>storeName</code>	string?	—	Pill in the utility row — store name, on-hand, etc.
<code>storeColor</code>	color hex?	—	Color for the store-emoji circle in the pill.
<code>storeEmoji</code>	string?	—	Emoji or letter inside the store-pill circle.
<code>value</code>	number?	—	Right-aligned coin chip value. Formats ≥ 1000 as 'k'.
<code>valueLabel</code>	string		Optional currency/units string ('\$ ', 'pts').
<code>valueIsPrefix</code>	boolean	false	When true, label goes BEFORE the number ('\$ 42').
<code>rating</code>	int 0..5	0	User's PERSONAL rating, shown as a compact ★N chip. Tap or long-press opens the 5-star picker; the engine calls <code>onRate(n)</code> . When 0 (unrated), the chip reads 'Rate'.
<code>communityRating</code>	number?	—	Aggregate / community rating, shown as a second ★X.X chip in a different tone. Read-only. Hidden when null.
<code>communityRatingCount</code>	number?	—	Social count appended to the community chip (e.g. 22000 → '22k'). Hidden when null.
<code>saved</code>	boolean	false	Heart filled (pink) when true.
<code>onTap</code>	callback?	—	Tap-the-card target.
<code>onRate</code>	callback?	—	Per-star tap. When null, the star row is hidden.

PROP	TYPE	DEFAULT	DESCRIPTION
<code>onToggleSave</code>	callback?	—	Heart-icon tap. When null, no heart shown.
<code>onShare</code>	callback?	—	Share-icon tap. When null, hidden.
<code>onMenu</code>	callback?	—	:icon tap. When null, hidden.

21 SCENARIOS

Bare minimum — title + image

`minimal_title_only`

Smallest valid card. Image tile + title only.

Bananas

Title + one-line subtitle

`title_with_subtitle`

Subtitle reads like a sentence summary.

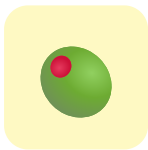

Milk Gallon

Bought ×3 · last May 30 ·
\$14.97 total

Value chip — dollar prefix (\$42.50)

`value_coin_dollar_prefix`

Currency before the number; coin chip on the right.

Olive Oil

Bought ×4 · \$42.50 total

★ \$42.50

Value chip — points suffix (1.5k pts)

`value_coin_points_suffix`

Points appended; thousands abbreviated.

Smartf Popcor

Select varieties

★ 1.5k pts

Mid rating — 3 stars

`rating_three_stars`

Stars in the utility row, ★★☆☆☆.

Greek Yogurt

Bought ×5 · \$24.00 total

★ 3

Top rating — 5 stars

`rating_five_stars`

All five filled gold.

Coffee Beans

Bought ×8 · \$96 total

★ \$96

★ 5

Urgency badge — "Buy 2"

`urgency_buy_two_badge`

Purple-ish pill, NO lightning bolt (the trigger is the word 'left').

Buy 2

Bactine First Aid

Select varieties

Urgency badge — "533 left" with lightning bolt

`urgency_left_lightning`

Rose pill with a lightning prefix automatically because text contains 'left'.
