GuacScore — 20-Scenario Cross-Surface Report

Web dashboard tile · web /guacanomics (30d / 90d / 12mo / All-time) · cross-validated against the mobile Dart engine via fixture suite. Generated 2026-08-14.

All 53 assertions passed across 20 scenarios — engines agree across every surface.

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Brand-new user — no rated receipts `brand_new_user_no_rated` User just signed up, has no ratings yet. Score should be null and the UI shows the 'Just Starting' placeholder.	— 0 rated · pen 0	— 0 rated · pen 0	— 0 rated · pen 0	— 0 rated · pen 0	— 0 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score is null (no rated rows) • ✓ guacanomics_30d score is null (no rated rows) • ✓ guacanomics_90d score is null (no rated rows) • ✓ guacanomics_12mo score is null (no rated rows) • ✓ guacanomics_alltime score is null (no rated rows)
Single 5★ receipt `single_five_star` One rated purchase, 5 stars. Score should peg at 100 ('Smash Master').	**100** 1 rated · pen 0	**100** 1 rated · pen 0	**100** 1 rated · pen 0	**100** 1 rated · pen 0	**100** 1 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 100 • ✓ guacanomics_alltime score ≈ 100

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Single 1★ regret `single_one_star` One rated purchase, 1 star. Score should bottom at 0 ('Just Starting').	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 0 • ✓ guacanomics_alltime score ≈ 0
Single 3★ neutral `single_three_star_neutral` One purchase rated middle-of-the-road. Score should land at 50 ('Treat Mode').	**50** 1 rated · pen 0	**50** 1 rated · pen 0	**50** 1 rated · pen 0	**50** 1 rated · pen 0	**50** 1 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 50
Equal-weight 5★ and 1★ → balances to 50 `equal_weight_5_and_1_balance` Two receipts of equal dollar amount, one 5★ one 1★. Should land at exactly 50.	**50** 2 rated · pen 0	**50** 2 rated · pen 0	**50** 2 rated · pen 0	**50** 2 rated · pen 0	**50** 2 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 50
Big 5★ outweighs small 1★ `high_value_5star_outweighs_low_1star` $500 essential outweighs $5 regret. Score should be very close to 100.	**99** 2 rated · pen 0	**99** 2 rated · pen 0	**99** 2 rated · pen 0	**99** 2 rated · pen 0	**99** 2 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 99 (big 5★ dominates)
Big 1★ regret drags score down `high_value_1star_drags_score_down` One $1000 regret + several small 4★ smart buys. Score lands low because the regret dominates the weighted average.	**5** 4 rated · pen 0	**5** 4 rated · pen 0	**5** 4 rated · pen 0	**5** 4 rated · pen 0	**5** 4 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 8 (big 1★ dominates)

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Many neutral 3★ buys `many_3star_neutral` Ten receipts all rated 3★. Score stays at 50.	**50** 10 rated · pen 0	**50** 10 rated · pen 0	**50** 10 rated · pen 0	**50** 10 rated · pen 0	**50** 10 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 50
All 5★ across many receipts `all_5star_lifetime` User rates 8 purchases all as essentials. Score pegs 100.	**100** 8 rated · pen 0	**100** 2 rated · pen 0	**100** 3 rated · pen 0	**100** 6 rated · pen 0	**100** 8 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 100 • ✓ guacanomics_alltime score ≈ 100
All 1★ — heavy regret `all_1star_huge_regret` Every rated purchase is 1★. Score bottoms at 0.	**0** 5 rated · pen 0	**0** 5 rated · pen 0	**0** 5 rated · pen 0	**0** 5 rated · pen 0	**0** 5 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 0 • ✓ guacanomics_alltime score ≈ 0
Mixed ratings + small bank fee penalty `mixed_ratings_with_small_bankbite` Mostly 4★ + a small annual fee. Score is high but penalized 1-2 points.	**73** 4 rated · pen 5	**73** 4 rated · pen 5	**73** 4 rated · pen 5	**73** 4 rated · pen 5	**73** 4 rated · pen 5	• ✓ dashboard ≡ /guacanomics All-time (same scope)
Huge bank fees relative to spend → -25 penalty cap `huge_bankbite_caps_at_25` $30 essential + $500 interest. Penalty must cap at the documented max of -25 regardless of how lopsided the ratio is.	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard bankPenalty ≤ 25 (penalty capped)

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Interest-only stings more than fees-only per dollar `interest_only_bigger_penalty_than_fees` $100 5★ + $50 interest. Per-dollar coefficient is 1/25 for interest vs 1/50 for fees, so interest produces a bigger penalty than the same dollar amount in fees.	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ interest stings more per $ than fees
Fees-only — lighter penalty than the equivalent interest `fees_only_lighter_penalty` Same spend / same dollar bank-bite as the prior scenario, but the bite is all fees (no interest). Penalty should be SMALLER than the interest-only case.	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	**75** 1 rated · pen 25	• ✓ dashboard ≡ /guacanomics All-time (same scope)
Returns (negative amounts) don't drag the score `returns_excluded_by_engine` User returns a $200 5★ purchase. The negative total_amount is excluded from the rated set, so the remaining 1★ regret defines the score.	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	**0** 1 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score ≈ 0 (return ignored, 1★ defines score)
Statement-import card payments filtered out `payment_receipts_filtered` User has 2 real purchases + 3 imported card-payment rows (store_name '[card payment] AmEx'). isPaymentReceipt must strip the payment rows before scoring.	**85** 2 rated · pen 0	**85** 2 rated · pen 0	**85** 2 rated · pen 0	**85** 2 rated · pen 0	**85** 2 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ payment receipts filtered from rated set

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Old receipts excluded from /guacanomics 30d view `old_receipts_excluded_30d` User has one 1★ regret from 200 days ago + recent 5★ buys. Dashboard tile (lifetime) shows a blended score; /guacanomics 30d shows pure 5★. Demonstrates scope-driven divergence.	**15** 4 rated · pen 0	**100** 3 rated · pen 0	**100** 3 rated · pen 0	**15** 4 rated · pen 0	**15** 4 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ /guacanomics 30d shows only recent 5★ • ✓ dashboard reflects lifetime (lower due to old 1★)
Receipt at exactly the 90-day boundary `exact_90d_boundary` Receipt date is exactly 90 days ago. With the midnight-snap fix it should be INCLUDED in the 90d window (>=since), not flicker based on the time of day the user opened the page.	**75** 2 rated · pen 0	— 0 rated · pen 0	**75** 1 rated · pen 0	**75** 2 rated · pen 0	**75** 2 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ 90d-old receipt INCLUDED in 90d window (midnight snap)
Lifetime high, 30-day low — scope divergence is expected `lifetime_high_30d_low_divergence` User had a great year (lifetime 90+) but their last 30 days were all impulse buys (regret-heavy). Dashboard tile = lifetime score (high), /guacanomics 30d = recent score (low). This DIVERGENCE IS A FEATURE — both are correct.	**88** 9 rated · pen 0	**8** 3 rated · pen 0	**8** 3 rated · pen 0	**88** 9 rated · pen 0	**88** 9 rated · pen 0	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ lifetime high (≥80) • ✓ 30d low (≤30) • ✓ divergence is real — dashboard much higher than 30d

SCENARIO	DASHBOARD TILE lifetime	/GUACANOMICS 30D last 30d	/GUACANOMICS 90D last 90d	/GUACANOMICS 12MO last 365d	/GUACANOMICS ALL lifetime	ASSERTIONS
Receipts exist but none are rated yet `only_unrated_receipts` User has 5 purchases logged but hasn't rated any. Score is null because `rating != null` filter excludes them all.	— `0 rated · pen 0`	— `0 rated · pen 0`	— `0 rated · pen 0`	— `0 rated · pen 0`	— `0 rated · pen 0`	• ✓ dashboard ≡ /guacanomics All-time (same scope) • ✓ dashboard score is null (no rated rows) • ✓ guacanomics_30d score is null (no rated rows) • ✓ guacanomics_90d score is null (no rated rows) • ✓ guacanomics_12mo score is null (no rated rows) • ✓ guacanomics_alltime score is null (no rated rows)
