# Wikipedia Lookup — 20-Scenario Report

Tests `cleanProductNameForLookup` (pure) and the live Wikipedia REST hits that turn cleaned names into real Stash card images.

**All 20 assertions passed.**

Network portion skipped. Run `WIKI_NETWORK=1 node web/scripts/test-wikipedia-lookup-scenarios.mjs` to verify each cleaned name actually resolves to an image.

Cleaner lives in `web/src/lib/productImage.js#cleanProductNameForLookup`. The full pipeline (cache → wiki → CSE fallback) is in `resolveProductImage`. Mobile uses the same endpoint via `mobile/lib/services/product_image_service.dart`.
