

THE NARRATED TOUR · FINAL

Take control of your money.

Our specifics, sharpened with calmer, outcome-first framing.

Current narration + v2 framing (Aeris · Origin · Monarch), combined

Current vs v2 — and what we shipped

Current narration

- › Rich, specific, concrete examples
- › But: feature-first — opens “Step two...”
- › Long — 14 slides, ~6 minutes

v2 framing

- › Feeling-first, calm, never preachy
- › Two-beat taglines, clear arc
- › But: lighter on hard specifics

This deck (final)

- › Outcome-first headlines + arc
- › All the concrete detail restored
- › Calm, tight, free/private/yours

The final narration keeps every number and example, but leads with the payoff and drops the “Step N” scaffolding.

Same substance, better delivery

CURRENT

Step two — and this is where the magic really kicks in. Guac-AI reads your receipt. We're talking five to fifteen seconds — faster than you can finish your coffee. Behind the scenes, Google's Gemini vision model scans the image, with Groq's lightning-fast inference as backup, and OCR cleanup to catch anything the first pass missed. What does it pull out? Everything. The store name. The date. The total...

FINAL

Then the magic. In five to fifteen seconds — faster than you finish your coffee — Guac-AI reads the store, the date, the total, the tax, even the last four of your card. Every line item becomes searchable history: want to know what you've spent on coffee this year? Search the name.

WELCOME

Take control of your money.

Snap a receipt. See the savings.

“Welcome to GetGuac — your money's wingman. Every receipt you've lost, every fee you didn't notice, every subscription quietly draining your account — GetGuac catches it all. Snap a photo, forward an email, or drop in a statement, and watch Guac-AI turn raw paper into searchable, scored, beautifully categorized spending. No spreadsheets, no shoebox. Free, private, and on your side — here's the whole flow.”

Free, private, and on your side

Receipts in → clarity out

No spreadsheets, no shoebox

STEP 1 • CAPTURE

Every receipt, captured.

No shoebox. No typing.

“Getting receipts in is the easy part — three ways that fit real life. Snap a paper receipt at the restaurant or gas station, even crumpled or faded, single shot or a batch of three. Forward your Amazon and Uber receipts to your free at-getguac-dot-app inbox and they file themselves in ten minutes. Or drop in a statement, and every line becomes a tracked receipt. However you shop, GetGuac is ready.”

Camera — snap any receipt, single or batch

Email — forward to your @getguac.app inbox

Statement — every line tracked (optional)

STEP 2 • READ

It reads every line for you.

Five seconds. Zero typing.

“Then the magic. In five to fifteen seconds — faster than you finish your coffee — Guac-AI reads the store, the date, the total, the tax, even the last four of your card. Every line item becomes searchable history: want to know what you've spent on coffee beans this year? Search the name. It even captures the refund policy, and fills the gap with curated defaults when a receipt doesn't print one.”

Store, date, total, tax, card

Every item, searchable by name

Refund policy captured automatically

STEP 3 • SEE

Know exactly where it went.

Your money, finally clear.

“Here's where it all comes together. Duplicate receipts collapse into one — the dinner you photographed, that the restaurant emailed, that hit your statement, become a single clean row. Spending sorts itself into clean categories, and your dashboard shows your top stores by dollar — grouped smartly, so Amazon doesn't split into five bars. Tax broken out for filing, price drift on what you rebuy. No judgment, no clutter — just a clear, honest picture.”

Auto-categorized, duplicates merged

Spending by store and category

The real numbers — no shame, no clutter

WORTH-IT • GUACSCORE

Spend on what's worth it.

One tap. A sharper picture.

“Now the part that changes habits — gently. Tap a quick Worth-It rating, one to five stars, on a purchase. Two seconds, and it rolls into your GuacScore: one simple number for how well you're really spending. Watch it climb as the things you regret drop away. It's encouragement, not a lecture — GetGuac is in your corner, not over your shoulder.”

Rate any purchase in two seconds

GuacScore — a single, clear number

Encouraging, never preachy

GUACWIZARD • BANK BITES

Catch what's quietly draining you.

Honest help, never a lecture.

“Meet the GuacWizard — calm, honest money guidance that never shames you. It scans your statements and surfaces the bank bites: every dollar of interest, fees, and penalties, and which card charged them. But it only nudges you on the ones you could avoid — the thirty-five-dollar overdraft, not the APR you couldn't escape. Plain English: ‘You paid one hundred eighty-seven in interest this month — paying in full would save it every month.’”

**Finds interest, fees & forgotten
subscriptions**

Flags only the avoidable ones

Plain-spoken — never a guilt trip

RETURNS & REFUNDS

Get back what you're owed.

Never miss a refund.

“Here's money most people lose every year — to return windows that quietly close. GetGuac watches them for you. Every receipt's refund deadline gets a countdown, per item, that turns yellow then red as it nears — fifteen days for Best Buy electronics, thirty for Amazon, essentially lifetime for Costco, plus defaults for twenty-five major merchants. Decide to send something back? One tap. The money you're owed stays yours.”

A countdown timer per item

Return & price-drop deadlines tracked

25+ store refund policies built in

STEALS

Pay less for the same thing.

A better price, found for you.

“On the things you buy again and again, Steals quietly scouts for a cheaper price — so next time, you pay less for the very same item. No coupons to clip, no tabs to compare. Just a better deal, surfaced for you, on what you already get.”

Cheaper prices on your repeat buys

No coupon hunting, no tab juggling

Found for you, automatically

PLAN & SHARE

Your money, working for what matters.

Every penny, with a purpose.

“The money you save isn't for us — it's for what matters to you. A recession-proof cushion. Retirement. Your kids' school. Health, or a little to give back. Build a shopping list on the fly and share it with family in a tap, and watch the small wins add up into something real.”

Share a shopping list in one tap

Small wins that add up over time

Toward retirement, school, health, giving

TRUST

Free, private, and yours.

No ads. No selling. No catch.

“And here's what makes the rest easy to trust. GetGuac is free — no card, no ads, no catch. We never sell your data, and no bank login is required. Every row is locked to you alone by row-level security — even we can't read across accounts. Your receipts are encrypted, your sign-in gated by Face ID. Export everything as JSON, or delete it all in one click — gone in seconds. Your guac stays in your bowl.”

Free — no card, no ads

We never sell your data

Export or delete in one click

GET STARTED

Snap your first receipt.

See clearly. Keep more. Watch it grow.

“So here's the short version. GetGuac captures every receipt, reads it in seconds, shows you exactly where your money goes, helps you keep more of it, and protects what you're owed — all while your data stays yours. Ready to take control? Snap your first receipt, and watch your money finally make sense. Welcome to GetGuac.”
