

🌟 HOW GETGUAC WORKS

From receipt to insight, in seconds.

Forward an email, snap a photo, or import a credit-card statement — Guac-AI does the rest. Press **Play** to watch the whole flow.

🌐 Web

🛡️ Private by default

1

THREE WAYS IN

Get a receipt

- **Camera.** Snap a paper receipt from the mobile app — single shot or batch of up to three at a time.
- **Email.** Forward an e-receipt to your free you+g@getguac.app inbox. It auto-files in 10 minutes.
- **Statement (optional).** Want a complete picture? Drop a credit-card or bank statement PDF and every line becomes a receipt row. Totally optional — skip it if you'd rather just snap and forward.

1b**BUILT FOR ONLINE SHOPPING**

Your @getguac.app inbox

you@getguac.app

- **Your own address.** Pick any handle: you@getguac.app. Yours forever, free with every account.
- **Forward receipts.** Send any receipt to you+g@getguac.app — the +g tag tells our mail server to auto-file and parse it within ten minutes.
- **Real two-way mail.** It is a full mailbox: open, read, reply, send. Not just a parsing trick.
- **Shopping shield.** Hand it out to merchants instead of your real email. Promos, spam, breaches stay outside your personal inbox.

UNDER THE HOOD

Email watcher

2

5-15 SECONDS

☆ Guac-AI reads it

- **Store + date + total.** Tax, payment method, last-4 of the card. Even handwritten totals on faded paper.
- **Itemized line items.** Every SKU, qty, price. Items become history you can search by name.
- **Refund policies.** Printed on the receipt? Captured. Not printed? Curated store defaults fill the gap.

UNDER THE HOOD

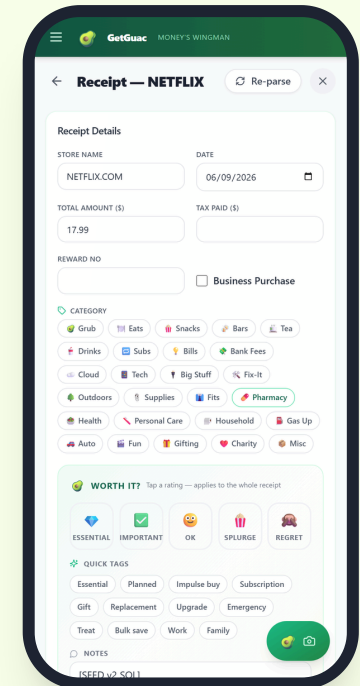

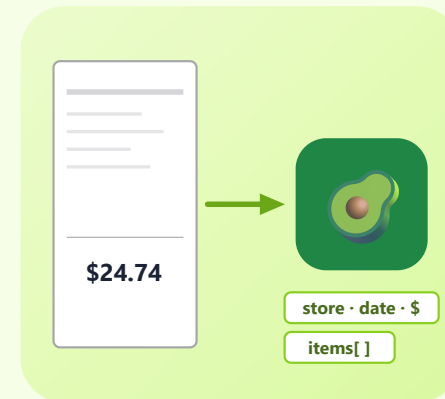

Gemini vision

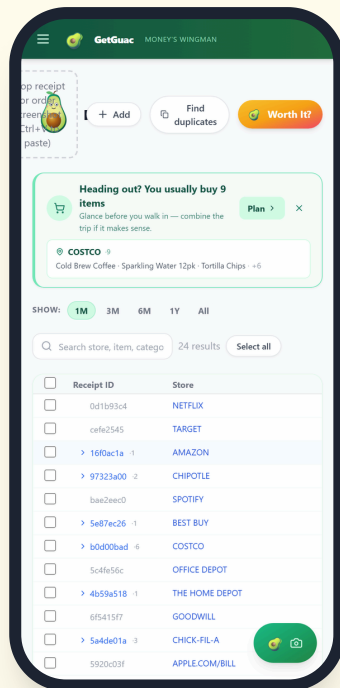

Groq fallback

OCR cleanup

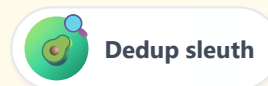

3 CAPTURE-TIME + SWEEP

Duplicates get caught

- **Same receipt, twice.** Two camera shots of the same restaurant bill won't both land in the table.
- **Email + camera.** Forward an Amazon receipt and snap the box — Guac-AI notices the match.
- **Smart matching.** Normalized store names + ± 1 cent tolerance — GLORY DAYS GRILL still equals Glory Days Grill.

UNDER THE HOOD

4

RULES + AI

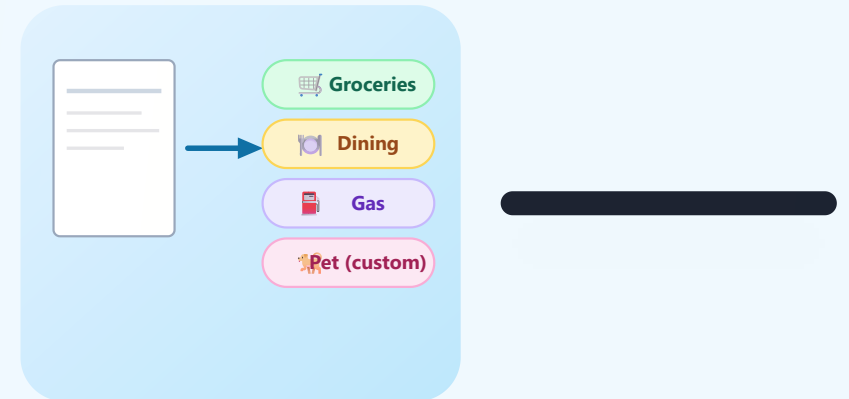

Auto-categorize

- **12 built-in categories.** Groceries, dining, gas, electronics, home, charity, and more — out of the box.
- **Your own categories.** Add custom ones — Pet, Yoga, Side Hustle — with their own emoji and color.
- **Bulk auto-categorize.** One button on Receipts assigns the obvious ones; you confirm or override the rest.

UNDER THE HOOD

Auto-tagger

5

DASHBOARD + REPORTS

See where it all went

- **Spending by Store.** Top merchants by dollar, grouped across name variants so Amazon doesn't split into five bars.
- **Category breakdown.** 1M / 3M / 1Y / all-time slices, with tax separated out for business filing.
- **Repeat purchases.** Items you bought again — track price drift on the things you actually use.

UNDER THE HOOD

Insight analyst

Spending by Store

Last 90 days

6

DECISION FEEDBACK LOOP

 Worth it?

- **Rate every purchase.** Five-star Worth-It rating per receipt — takes 2 seconds.
- **GuacScore.** A single number for how well you are spending that tightens as low-rated purchases drop off.
- **Bank Bite.** Interest, fees, penalties from your statements — the wizard nudges you when they are avoidable.

UNDER THE HOOD

Worth-It judge

Worth-It · per receipt

6b**DON'T LOSE MONEY YOU'RE OWED**

Returns & refunds, finally tracked

**money back, on time**

- **Per-item refund window.** Every receipt parses the store's refund policy: 30 days, 90 days, lifetime — even item categories with their own rules (electronics 15 days vs general 90 days).
- **Countdown timer per item.** Open any receipt and see exactly how many days you have left to return each line — color-codes red as the window closes.
- **Mark items returned.** Tap a checkbox on the item. We track partial returns (returned 2 of 3) and the refund value so the receipt totals stay accurate.
- **Returns report.** A dedicated /returns page lists everything you've sent back, with running totals so you know how much money has come back this year.
- **Curated store defaults.** Even when the receipt doesn't print the policy, GetGuac knows Amazon is 30 days, Costco is essentially lifetime, Lowe's is 90, Apple is 14, and so on — 25+ major merchants pre-loaded.

UNDER THE HOOD

**Refund tracker**

✧ GuacWizard — magically protects your money

- **Bank Bite watcher.** Surfaces every dollar of interest, fees, and penalties from your statements — and exactly which card charged them.
- **Avoidable vs. unavoidable.** Knows the difference between an APR charge you couldn't escape and a \$35 NSF you absolutely could. Polite nudges only on the avoidable ones.
- **Top regrets list.** Receipts you rated 1 or 2 stars, sorted by dollars wasted. Read it once a quarter to spot the pattern.
- **Insights, not lectures.** 'You paid \$187 in interest this month — paying the balance in full would save it every month.' Calm, specific, actionable. No shame, no buzzwords.
- **Periodic patterns.** Spots subscriptions you forgot, restaurant overspends, gas-station impulse buys — and points them out kindly, on your time.

FOR TAXES, REIMBURSEMENTS, BUSINESS RUNS

Car Miles — track every drive

- **Share-to-track.** Share any Google Maps destination to GetGuac — the trip records itself with from / to / distance / date.
- **Auto-distance.** Reverse-geocodes your current location as 'From' so you don't have to type anything. Distance computed from the maps link.
- **Tax-ready logs.** Tag each trip Business, Medical, Charity, or Personal. End-of-year export gives you the audit-ready mileage log the IRS wants.
- **Open in Maps.** Every saved trip has a one-tap button to open Google Maps for directions if you do it again.
- **No background tracking.** We never wake up in the background, never ping your location while you're not driving. Location is read once, when you share.

UNDER THE HOOD

Trip logger

Security you can audit

- **Row-level security (RLS) in Postgres.** Every receipt, item, store, reward, email is gated by your `auth.uid()` in the database itself — not just in app code.
- **Encrypted at rest, TLS in transit.** Supabase storage encrypts your receipt photos at rest; every request is TLS 1.2+. Mailbox passwords are AES-GCM encrypted with a separate key the app code can't read.
- **Biometric unlock on mobile.** Fingerprint or Face ID gates the app on every cold start. Credentials live in Android Keystore / iOS Keychain — never plain-text on disk.
- **No third-party trackers.** No Google Analytics, no Facebook pixel, no ad SDKs. We don't sell, share, or analyze your data for anyone else's benefit.
- **Diagnostic logs are yours too.** Even the debug events the mobile app uploads sit behind RLS — only you and you alone can read your own `/api/me/logs`.

DELETE ANYTHING, ANY TIME

Your data, your call

export or delete, any time

- **Delete individual receipts.** Trash icon on any row. Cascades through receipt_items, refund policies, and the photo in storage.
- **Delete individual emails.** The inbox lets you delete any message — body, attachments, parsed receipt link, all of it.
- **Privacy sweep.** Profile → Privacy lets you wipe categories of data — emails, receipts, items, statements, logs — in one tap.
- **Full data export.** Download every row we have about you as a JSON archive. Take it with you wherever.
- **Delete the whole account.** Account → Delete account. One click, full purge: receipts, emails, photos, debug logs, mailbox creds. Gone in seconds. We don't keep backups of deleted accounts.

UNDER THE HOOD

Privacy guard

 **YOURS, ONLY YOURS**

Every receipt stays in your account.

Row-level security at the database means GetGuac literally can't query your data without your token. No selling, no ad targeting, no resale of merchant data.

THE TOUR CONTINUES

New in GetGuac

Beyond receipts — a marketplace, live coupons, money calculators with Guac-AI, and a bills calendar.

 Marketplace

 Coupons

 Calculators

 Bills

MARKETPLACE · DEALS

Find the best price on anything

- 1 Type any product or store in the search bar.
- 2 See live prices across Walmart, Amazon, Target & more — ranked by discount.
- 3 Save the search; sign in and GetGuac watches it for price drops.

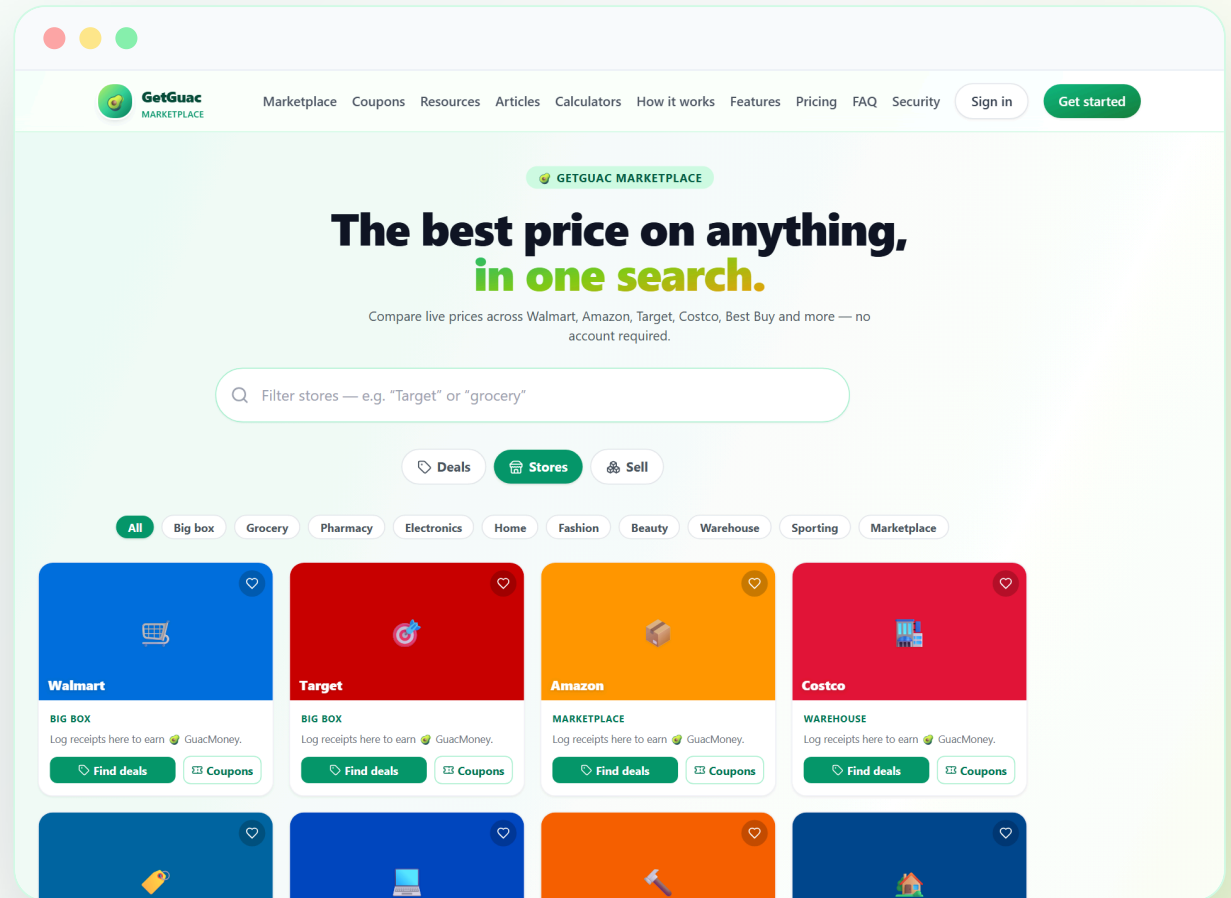

MARKETPLACE • STORES

Grab a store coupon

- 1 Open the Stores tab and pick a retailer.
- 2 Tap "Coupons" on its card.
- 3 See live promo codes pulled from Google — click through to redeem.

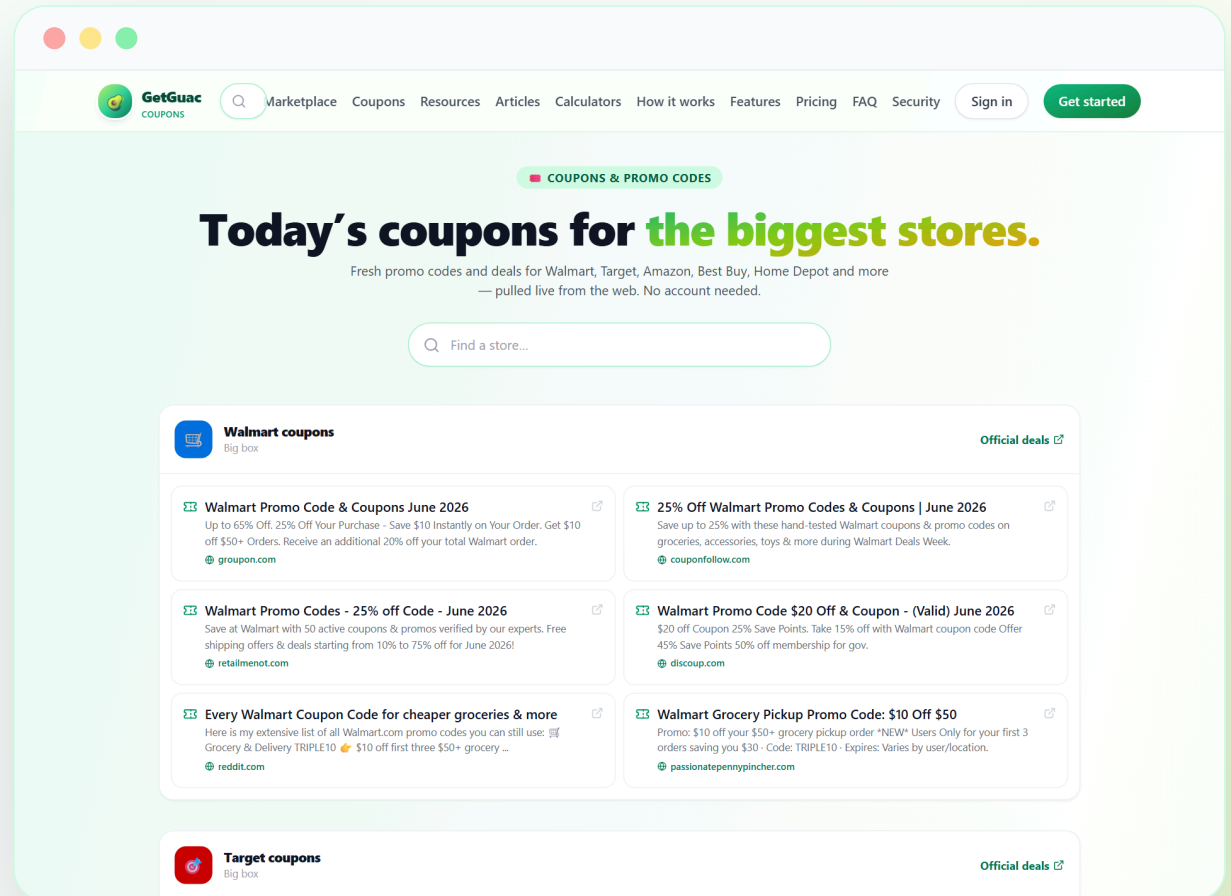

COUPONS

Browse every big-store coupon

- 1 Open the Coupons page — no account needed.
- 2 Scroll the biggest stores, each with current codes.
- 3 Click an offer to open it at the source and use it at checkout.

PLAN & FORECAST

Plan a money goal in seconds

- 1 Pick a calculator from the left (retirement, mortgage, college...).
- 2 Enter your numbers and press "Plan it".
- 3 Get a forecast + a Guac-AI strategy with tax tips — then save it.

Update plan

At 65: ~\$843,612 · you'd want ~\$1,500,000 (25× your \$60,000/yr).
~\$653/mo closes the gap. Totally doable.

GUAC-AI STRATEGY

Increase your 401(k) contribution to at least 10% of your income, aiming for the maximum if possible.

Open a Roth IRA and contribute the maximum allowed for 2024, which is \$7,000.

If eligible, consider opening an HSA and contributing the maximum, as it offers a triple tax advantage.

Automate your savings by setting up recurring transfers from your checking to your investment accounts.

TAX BENEFITS

401(k): You can contribute up to \$23,000 in 2024, plus any employer match, which is tax-deferred.

Roth IRA: Contribute up to \$7,000 in 2024; your withdrawals in retirement are tax-free.

HSA: For 2024, you can contribute \$4,150 for self-only coverage or \$8,300 for family coverage, offering tax-deductible contributions, tax-free growth, and tax-free withdrawals for qualified medical expenses.

You're doing great by starting early and consistently; keep up the fantastic work, and your future self will thank you!

Sign up free to save your plan.

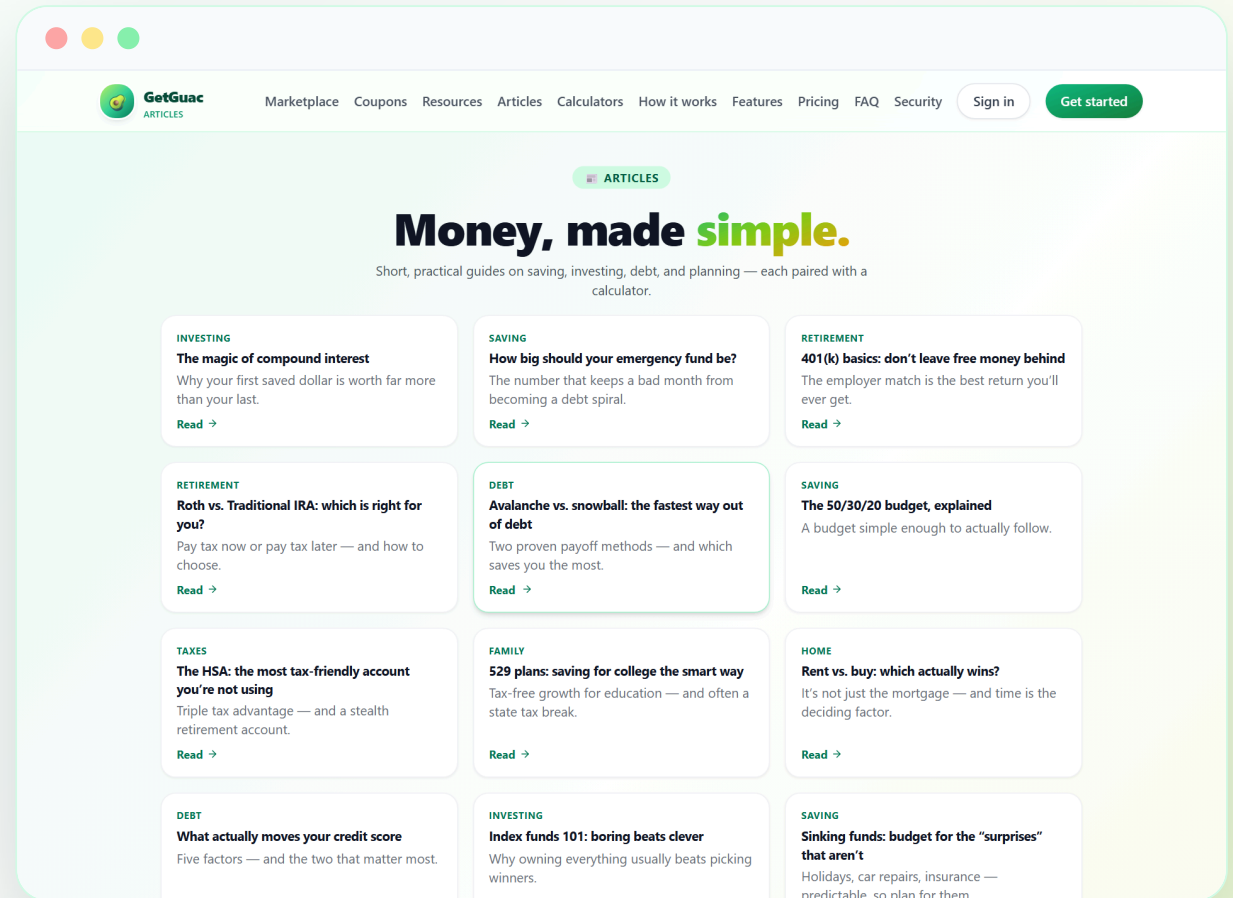

Strategy guide & pros / cons

ARTICLES

Learn it, then do it

- 1 Browse short, plain-English money guides.
- 2 Read a 2-minute article (compound interest, emergency funds...).
- 3 Tap “Run the numbers” to jump into the matching calculator.

BILLS CALENDAR

See bills before they hit

- 1 Add receipts and bank statements as usual.
- 2 GetGuac detects your recurring subscriptions automatically.
- 3 They land on a calendar with due dates + an upcoming-bills list.

The screenshot shows the GetGuac application interface. On the left is a sidebar with a navigation menu. The main area displays a calendar for June 2026, with the 18th highlighted. To the right of the calendar is a 'Due today' section showing 'No bills due.' and an 'Upcoming bills' section listing several bills with their due dates and amounts.
