Auth negatives + positive/functional · live + Android · 2026-06-14

31

CASES

31

PASSED

0

OPEN BUGS

Status 31/31 pass · 0 open bugs

✓ **All clear — 0 open bugs.** The one bug found earlier — **BUG-1: usernames accepted 1 character** despite the "3–32 chars" rule — was fixed (regex now enforces 3+ across web, API & mobile) and is **verified resolved**: the auth-negative suite is now 10/10 (was 9/10), and the live API returns a→invalid, ab→invalid, abc→available.

Auth negatives — Register & Login 10/10 pass

ID	AREA	CASE	RESULT	STATUS
R1	Register	Empty form	Submit is disabled	PASS
R2	Register	Invalid username "a"	Must start and end with a letter or number · 3–32 chars	PASS
R3	Register	Reserved username "admin"	Reserved word — try something else	PASS
R4	Register	Available username	qaneg7421@getguac.app is available	PASS
R5	Register	Terms unchecked	Submit disabled	PASS
R6	Register	Password < 10 chars	Blocked: "Please lengthen this text to 10 characters or more (you are currently using 6 characters)."	PASS
R7	Register	Password mismatch	Passwords do not match	PASS
R8	Register	Invalid email format	Blocked: "Please include an '@' in the email address. 'notanemail' is missing an '@:'."	PASS
L1	Login	Empty submit	Blocked (required)	PASS
L2	Login	Wrong credentials	× Invalid username or password	PASS

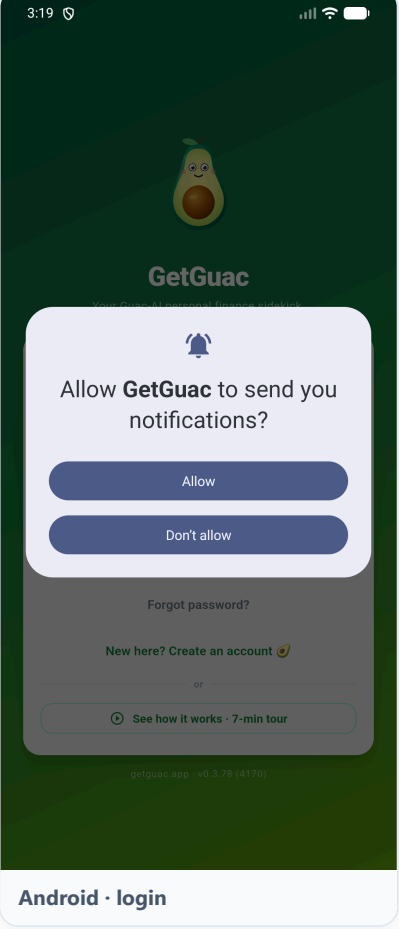

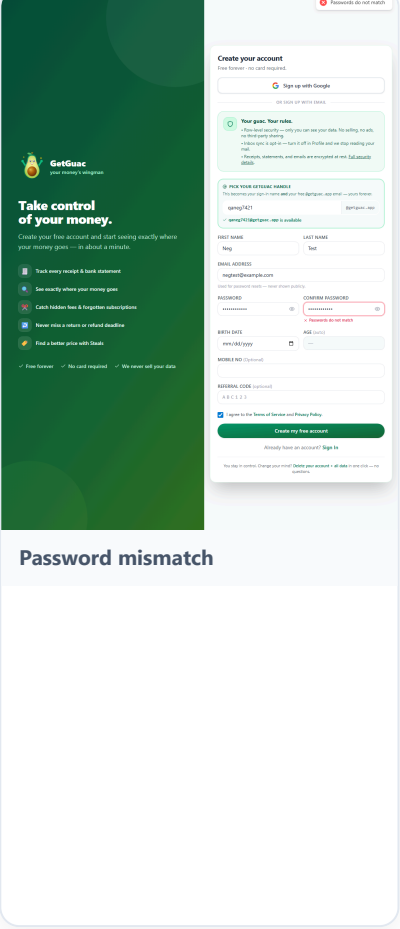

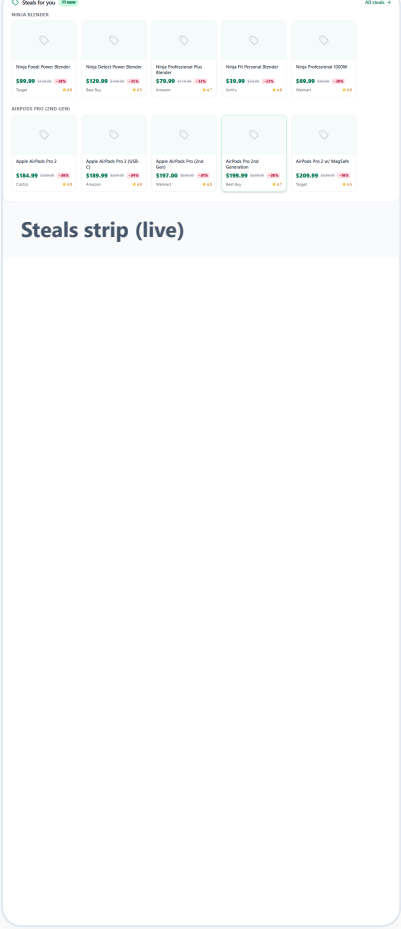

Positive + functional — logged in as demo 21/21 pass

ID	AREA	CASE	RESULT	STATUS
N1	Negative	Forgot-pw invalid email	Blocked	PASS
P0	Positive	Demo sign-in	Dashboard loaded	PASS
P1	Positive	Dashboard data	shows expected data	PASS

ID	AREA	CASE	RESULT	STATUS
P2	Positive	Receipts list (seeded)	shows expected data	PASS
P3	Positive	Reports categories (no Uncategorized)	shows expected data	PASS
P4	Positive	Steals restock list	shows expected data	PASS
P5	Positive	Returns items + window	shows expected data	PASS
P6	Positive	GuacWizard score + bites	shows expected data	PASS
P7	Positive	Bites worth-it	shows expected data	PASS
P8	Positive	Stash items	shows expected data	PASS
P9	Positive	Smashlist	shows expected data	PASS
P10	Positive	Bank statements/fees	shows expected data	PASS
P11	Positive	Guacanomics	shows expected data	PASS
P12	Positive	Rewards	shows expected data	PASS
P13	Positive	Invite code + share link	shows expected data	PASS
P14	Positive	Profile (John)	shows expected data	PASS
P15	Positive	Receipt detail parsed fields	parsed receipt shown	PASS
N2	Negative	Dead route /items	404 page	PASS
N3	Negative	Unknown route	404 page	PASS
N4	Negative	Steals empty query	handled	PASS
P16	Positive	Sign out	signed out → login	PASS

Also verified this cycle

- **Steals** — dashboard "Steals for you" strip live: deals grouped by configured search, top 5 each by best discount, with the "X new" found-count.
- **Email poll** — healthy (HTTP 200, 6 mailboxes); added clear 401/connection diagnostics to the workflow + server.
- **Mobile v0.3.79** — referral-code field + 3-char username fix shipped to /download.
- **Stress test** — read paths handle 20 concurrent requests cleanly (avg ~615ms); flagged that signup rate-limiting needs Upstash Redis configured to hold under bursts. The 20 test accounts created were deleted.

GetGuac complete test sweep · 31 cases (10 auth + 21 positive/functional) · 31 pass · 0 open bug · generated 2026-06-14. Tested against production (local dev lacks the Supabase service key, so auth/data paths run against live).
